

# HOW MUCH BARK MULCH DO YOU NEED?

**TO LAY YOUR BARK MULCH *3-INCHES THICK*,  
YOU SHOULD ORDER 1 CUBIC YARD FOR EVERY 100  
SQ. FT. (APPROX.) OF AREA TO BE COVERED.**

**TO CALCULATE THE SQ. FT.  
YOU NEED TO TAKE TWO MEASUREMENTS:  
LENGTH AND WIDTH.**

**FOR EXAMPLE: MY AREA IS 20 FT. LONG AND 30 FT. WIDE.  
LENGTH (20 FT.) x WIDTH (30 FT.) = 600 SQ. FT.  
USING THE ABOVE FORMULA.  
I CALCULATE THAT I WILL NEED TO ORDER 6 CU. YDS.  
(20 FT. x 30 FT.) / 100 = 6.0 CU. YDS.**

<b>CU. YDS</b>	<b>DEPTH</b>	<b>COVERS</b>
1 CU. YD.	1 IN. DEEP	324 SQ. FT.
1 CU. YD.	2 IN. DEEP	162 SQ. FT.
1 CU. YD.	3 IN. DEEP	108 SQ. FT.
1 CU. YD.	4 IN. DEEP	81 SQ. FT.
1 CU. YD.	5 IN. DEEP	64 SQ. FT.
1 CU. YD.	6 IN. DEEP	54 SQ. FT.
